

PINPOINT.

for Hyperion Enterprise®

PinPoint® for Hyperion Enterprise® is a software utility used exclusively with Hyperion Enterprise® 5.5 or higher by administrators, advanced users and consultants. PinPoint will help analyze Enterprise metadata by utilizing pre-defined reports combined with various selection criteria options to isolate the information needed. By making this information easily available in a readable format, the user can quickly identify issues with their application setup and therefore give more integrity to the final output of Enterprise.

Hardware/Software Requirements

These are the minimum system resources PinPoint for Hyperion Enterprise requires:

- Pentium III-class PC.
- Microsoft Windows 98 Second Edition, Windows NT Workstation 4.0 with Service Pack 6, Windows 2000 with Service Pack 2, Windows XP Professional or Home, or Windows 2003 Server.
- Hyperion Enterprise 5.5 or higher.
- Client-side software required for Enterprise Extract functionality. Administrator privileges required for Enterprise Extract functionality.
- 128 MB of RAM (256 MB recommended).
- CD-ROM drive if installing from a CD.
- Designed for XGA at 800 x 600 resolution or higher.

Installation Instructions

- Insert the PinPoint for Hyperion Enterprise CD-ROM in your CD-ROM drive.
- Follow the on-screen instructions.

If the installation does not automatically begin:

- Click **Start** on the Windows task bar.
- Click **Run**.
- In this box, type *D:\setup.exe* (where *D* is the letter of your CD-ROM drive).
- Click **OK** and follow instructions.

Note: If installing PinPoint on a server, make sure that proper permissions have been set in order for PinPoint to be able to have read only access to the Windows Registry. In addition, permissions need to be set for the back-end database as well (PinPoint_for_Hyperion_Enterprise.mdb).
